---

They need to figure out how to do better if that is possible. They need to adjust the number of buckets. That's 4 – 6 tons light.

The last 5 trucks that dumped yesterday in Itasca had a total of 90.85 tons, so we averaged 18.17 tons per truck.

The five trucks we sent out first turn yesterday to Itasca had 96.79, so we averaged 19.35 tons per truck.

Average for the day is 18.76 tons per load, and all trucks were Herod.

Gary,

Averages around 22-24 tons depending on the moisture content

Hello Kevin,

Angela shared with me your quote for hauling the waste from our project in Leonard.  
Can you tell me how many tons can be carried in the trailers that you are proposing?

Thanks
